Birds circling and descending to capture its prey

Could maybe have the prey be a rabbit for complex hopping

Probably better idea is a mole/shrew, as pictures are easier

Movements:

Bird -

Wander

SeePrey

Circle

Descend

Capture

Mole/Shrew:

Scrurry (Wander)

Scan (Stop periodically and look around)

Flee

Dead

Changable Parameters:

Bird Wander Speed

Bird Circle Speed

Bird Descent Speed

Mole Scurry Speed

Mole Time scanning

Mole frequency scanning

Mole flee speed
